

Preserve 2020 and 2021 Virginia Election Data!

I know many Virginians have concerns about elections beginning in 2020 and about the integrity and transparency of the election that begins on September 23, 2022. If you follow the election Virginia integrity and transparency topic you, like me, may have come to think about this as an Election *Insecurity* and *Obscurity* system.

Or you may have been convinced that while the Virginia Election System is not perfect, it is not systemically corrupt and there is no evidence that any corruption or fraud would not have overturned any 2020 or 2021 election. In either case you deserve to know for sure and to be confident and proud of our Commonwealth's Election System.

One of the issues citizens face is that the system is opaque. They cannot get the data, the Cast Vote Records, and inside the digital storage and manipulation of election data. The system appears to be designed to be complicated and no one really seems to know what happens to your vote once it is translated into ones and zeros.

So, citizens cannot analyze the data and records and therefore cannot document the issues that led to numerous anomalies and irregularities reported to date. A senior Attorney in the Attorney General's Office has argued, the Office of the AG *"...has not seen any evidence of widespread fraud that would change the results of Virginia's 2020 election. Therefore, we have no justification [to] commence a proceeding to stop the discarding of the ballots this year."* See Email chain [here](#).

In view of numerous anomalies and irregularities and errors documented by their citizens, the AG's Office Obama-worthy strawman argument, and Candidate Youngkin's pledge: ["So let's just audit the voting machines, publish it so everybody can see it."](#), Republican Committee Chairmen of the three largest Virginia counties have written the Governor asking him to take immediate action to preserve both the 2020 and 2021 election data from ballots to digital files and official communications. I am very proud of these leaders for taking a stand will allow citizens to investigate the data to improve Virginia Elections, (not to revisit outcomes). Here they are along with their letters to the Governor:

[Fairfax County Republican Committee](#) Chairman Steve Knotts (E-mail: info@fairfaxgop.org): See: [link](#) to letter. *"...that the Fairfax County Republican Committee calls on the Virginia Governor, Attorney General, Commissioner of Elections, General Assembly, Inspector General and, if appointed, a Special Counsel to take*

immediate steps to ensure the preservation of all digital and paper records associated with the 2020 and 2021 elections.”

[Loudoun County Republican Committee](#)

Chairman Scott Pio (Email:

info@loudoungop.com): See [link](#) to letter. “...I

respectfully request that you act immediately to preserve all electronic and print records

associated with the 2020 and 2021 elections,

including voter registration applications, so that

these materials remain available for the purpose of investigation

through September 3, 2024.”

[Prince William County Republican Committee](#)

Chairman: Denny Daugherty (Contact at:

<https://pwcgop.gov/contact/>): See [link](#) to letter.

“I write to ask you instruct appropriate state and

local officials of the Commonwealth, to preserve

all 2020 and 2021 paper ballots, election data and

related media in all counties. I similarly request

preservation of all communications between the Virginia Department of

Elections (ELECT), the Virginia Office of the Attorney General (OAG), and

all county registrars and other county-level officials involved in elections

that occurred between January 1, 2020, and December 31, 2021,

allowing disposition no sooner than September 3, 2024.

If you want to keep up with Election Integrity and Transparency (or Insecurity and Opacity) follow on these platforms:

Please thank the above Chairmen for taking a stand to hold Governor Youngkin to his pledge to Virginians.

And if you want to join these leaders in asking Governor Youngkin to preserve the election information, contact him c/o:

Ashley.traficant@governorvirginia.gov.

Go in Liberty!

Jeff Fuller
