This presentation is a summary of what we've learned from the hundreds of Citizen Auditors that have performed a crowd-sourced analysis of our Elections. Our Federal, State and Municipal Elections appear to be under attack by a Domestic Government that our Founding Fathers warned us about.

THE FINGERPRINTS OF FRAUD: EVIDENCE AND ANALYSIS OF A MULTI-STATE CONSPIRACY TO DEFRAUD THE 2020 GENERAL ELECTION, by Jeff O'Donnell, May 1, 2023 (Volume One)

All Voting Tabulators are required to record something called a Cast Vote Record. These data are very useful in determining the statistical time patterns of when votes are cast for candidates. Mail-In ballots for Candidates in a fair election should show casting times that are random. If they are not random, then that shows that the votes were manipulated towards a predetermined outcome. This report shows unequivocally that the "votes" in 2020 were manipulated across the Nation by a Centralized Algorithm that produced controlled outcomes.
